

# THD SLIDE DOPPLER PROBE

800056	800063
NOT STERILE - REUSABLE	STERILE - DISPOSABLE
	
<b>5 Shot (90 min/Shot)</b>	<b>One Shot – 90 min</b>

### Use

THD Slide Doppler Probe is intended to be used with THD Revolution and THD Evolution devices, for the treatment of haemorrhoidal disease, using the Transanal Haemorrhoidal Dearterialisation technique.

### General description

THD Slide Doppler Probe shall be used with the THD Slide One and it has been designed for maximum sensitivity to identify blood vessels.

Its small size allows the physician easy handling and when used with the Slide One anoscope/proctoscope which has a port to lodge the Doppler, the operating field is completely unobstructed.

THD Slide Doppler Probe is available in both Reusable (for limited treatments) and Disposable versions.

The Disposable Probe is individually packaged and sterile.

The Disposable Probe may be sterilised by Ethylene Oxide (ETO).
